SALIVARY CHANGES DURING PREGNANCY

Salivary Changes During Pregnancy

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Saliva is versatile and complex fluid and is necessary for various physiological functions in the oral cavity. Female sex hormones (estrogen, progesterone & human gonadotropin) are secreted primarily by the placenta and are responsible for most of the physiologic changes during pregnancy. Pregnancy increases the propensity to gingival inflammation known as pregnancy gingivitis with an enhanced gingival bleeding tendency without specific plaque association, periodontal pocket formation and also increased dental caries incidence. The book sheds...

Reviews

It in a single of the best pdf. it had been writtern quite properly and beneficial. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Mr. Maximo Johns**

This sort of ebook is every thing and made me hunting forward and a lot more. I have read through and i also am confident that i am going to going to go through once again once more in the foreseeable future. I discovered this publication from my dad and i encouraged this book to discover.
