THE UNITED STATES AND THEIR INDUSTRIES (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The United States and Their Industries The Continent of North America covers an area of more than seven millions of square miles, and is twice as large as Europe. About half of it, viz., 3,530,000 square miles, belongs to Canada and to the British Empire, and the rest to the United States. In this vast continent, which extends to the Arctic regions on the north to the Gulf of Mexico on the south, every possible variety of climate and scenery can be found. Contrasted with Europe, every natural feature, whether Lake, River, Forest, Plain, or Mountain, will be found to be on a great and magnificent scale. There is no such continuous Range in the world as the North American mountains, which traverse the whole continent from north to south, keeping close to the Pacific Ocean. In South America the same elevations are continued as far south as the Straits of Magellan. North America occupies a central position on the world s surface, and has, as it were, two doors, one looking towards Europe and one towards Asia. This is an important fact to remember when we look at the ocean highways of the world and see how they communicate with the ports and harbours of both sides of this continent.
