Are you looking to learn how to grow healthy plants without the use of chemicals? Organic farming produces the most delectable nutritionally dense foods on the planet! Even if you use the methods described to grow flowers it will help the planet because no man-made chemicals are used when growing organically. Gardening started out as a hobby of mine, but now it has quickly become a way of life in which I have found to be very peaceful. Practicing organic methods creates healthier plants, in turn this health transfers to the planet as well as your body if you consume what you grow. Some of the topics discussed include: seed choice, watering, composting, bacteria, fungus, macronutrients, micronutrients, pest control, and fertilizers. Happy Gardening!.
