Not illustrated. 1815 Excerpt: .to larger bodies, though with much smaller velocities: it is described, and a figure of it given, near the end of the 1st vol. of his works, and in the 3d vol. of my Tracts. That this resisting power of the air to swift motions is very sensibly increased beyond what Newton s theory for slow motions makes it, seems hence to be evident By other experiments it appears that the resistance is very sensibly increased, even in the velocity of 400 feet. However, this increased power of resistance diminishes as the velocity of the resisted body diminishes, till at length, when the motion is sufficiently abated, the actual resistance coincides with that supposed in the theory nearly. For these varying resistances Mr. Robins has given a rule, though not correct, extending to 1670 feet velocity. Mr. Euler has shown, that the common doctrine of resistance...
